## Communiqué

For immediate release  
September 13, 2024

### **Temporary lowering of the water level for work at Bryson generating station**

---

Hydro-Québec wishes to inform the public that, due to delays, we must modify the dates on which the water level will be lowered.

Between September 14 and October 4, the water level will be lowered by 30 to 50 cm upstream of Bryson generating station. This operation will allow the safe installation of a temporary wall on the powerhouse spillway, as part of the infrastructure rehabilitation project.

Hydro-Québec would like to thank the public, emergency services and municipalities for their cooperation and understanding.

Information : ligne Info-Projet au 1 800 465-1521, poste 6022.
